"Pressestimmen Using examples ranging from farmhouses to hospitals to Cedric Price’s Fun Palace, Peter Blundell Jones shows how the use of buildings is intimately tied to their social meaning. This carefully researched and well-argued book thereby helps re-cast architectural theory, bringing together separate frameworks—function, aesthetics and cultural value—into a single discourse. (Professor Howard Davis, Faculty for Architecture at the University of Oregon, USA) For those working in urban studies, Architecture and Ritual provides an important perspective on how human societies at any scale (family, tribe, city, nation) form and are formed by their built environments. It would be especially helpful for anyone working to understand people’s ways of life in the metropolitical context and how these ways are, to a significant degree, influenced by their architecture. (Journal of Urban Affairs) In a major contribution to the study of the anthropology of building, Peter Blundell Jones explores architecture’s role as a setting for communal rituals, balancing familiar and less familiar examples from a range of cultures to provide many insights into the shared origins of different expressions in the buildings of both modern and traditional societies. (Dr Eamonn Canniffe, Principal Lecturer at the Manchester School of Architecture, UK) Werbetext Through historic, contemporary and global case studies, this volume considers how architecture reflects, frames and defines social relations. May 21st, 2020 - Architecture and ritual explores how the varied rituals of everyday life are framed and defined in space by the buildings which we inhabit. It penetrates beyond traditional assumptions about architectural style, aesthetics, and utility to deal with something more implicit: how buildings shape and reflect our experience in ways of which we remain unconscious.

May 19th, 2020 - Mayan building materials. Mayans used a variety of local and imported construction materials for Mayan buildings. The most common construction material was the stone found locally in the quarries outside the cities. Limestone was particularly common since it was found in plentiful amounts throughout most of the Mayan settlements.

May 16th, 2020 - The design of the Tukanoans dwelling or Maloca draws upon ritual and has a complex spatial order in Dogon architecture. Numbers are especially important and geometry became a way of expressing spatial relations. The Dong people have developed buildings in keeping with their society's political structure.

History of Architecture

June 3rd, 2020 - Buildings very similar to those in Khirokitia are still lived in today in parts of Southern Italy where they are known as trulli. Whether it is a mud hut with a thatched roof in tribal Africa or an igloo of the Eskimo, the circle remains the obvious form in which to build a roofed house from the majority of natural materials.
